

React Foundation

Summary and Outro

Azat Mardan @azat_co

React is about
simplicity!

Module 1: Baby Steps

1. Hello World
2. JSX
3. Babel and Webpack
4. Hellow World with JSX

Module 2: Component-Based Architecture

Module 2: Component-Based Architecture

1. Composing Components
2. Variables
3. Props
4. States
5. Lists
6. Clock Project

Module 3: User Input

Module 3: User Input

1. Components Methods
2. Browser Events
3. Controlled Components
4. Refs and Uncontrolled Components
5. Timer Project

Module 4: Advancing Components

Module 4: Advancing Components

1. Prop Types and Default Prop Values
2. Higher-Order Components
3. Rendering Children
4. `componentDidMount()` and AJAX/XHR requests

Now, go ahead and teach React to
others! 🏁
